DETAILED ACTION

Election/Restrictions

Parent application 08/930,564 was a 371 application of PCT/US95/06386. The restriction requirement set forth below follows the lack of unity requirements for consistency with the restriction set forth in the parent application.

This application contains the following inventions or groups of inventions which are not so linked as to form a single inventive concept under PCT Rule 13.1.

- I. Claims 1-20, drawn to nucleic acids and polypeptides.
- II. Claim 21, drawn to an antibody.
- III. Claim 22, drawn to inhibitory compounds.
- IV. Claim 23, drawn to receptor activating compounds.
- V. Claim 24, drawn to a method of treatment by administering the protein.
- VI. Claim 25, drawn to a method of treatment by administering the inhibitory compound.
- VII. Claim 26, drawn to a method of treatment by administering a nucleic acid.
- VIII. Claims 27-28, drawn to a method for identifying compounds.
- IX. Claim 29, drawn to a method of diagnosis using nucleic acid sequences.
- X. Claim 30, drawn to a method of diagnosis using the protein.

The inventions listed as Groups I-IX do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I forms a single inventive concept and contains claims directed to a first appearing nucleic acid product, a first appearing method of

Art Unit: 1647

using the nucleic acid product as well as the polypeptide produced therein. Groups II-IV are drawn to structurally different products which do not share the same or a corresponding special technical feature. Groups V-X are drawn to methods having different goals, method steps, and starting materials which do not share the same or a corresponding special technical feature. Note that PCT Rule 13 does not provide for multiple products or methods within a single application.

Because these inventions do not relate to a single inventive concept under PCT Rule 13.1 as set forth above, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection

or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the even of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP 804.01.
